

ULN2003 Stepper Motor Driver Board

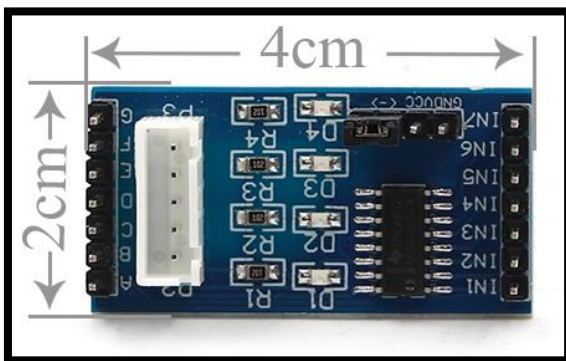

Description:

ULN2003 Stepper Motor Driver Board is to use the ULN2003 DARLINGTON ARRAYS to drive the 4-phase 5-wire stepper motor (5v-12v). It's easy to use Arduino or other development platform to drive the stepper motor by this driver board.

Specifications:

- ❖ Version : 1.0
- ❖ Operation Level : Digital 5V
- ❖ Power Supply : External 5V
- ❖ Number of Channels: 4
- ❖ Size: 4x2cm
- ❖ Weight : 20.00g
